

# AD02 Android Enterprise Application Development

Course Outlines

## AD02 Android Enterprise Application Development

Days of Training: 4

### Overview

Mobile based UI applications will be widely used in the future generations. This leads to an enormous opportunity of integrating the mobile applications with existing Enterprise Applications. The architectures and technologies intricacies are handled through Android Enterprise Application Development program.

Integrating Mobile Applications with Enterprise Systems brings enormous career scope and knowledge expansion on innovative technologies. This program enables the candidate to develop applications that can be integrated with Enterprise Technologies. It enhances the skill of the candidate from Android App Development to Integrating the App with Enterprise Applications.

### Prerequisites

AD01 Developing Applications on the Android OS platform

### Price

\$2,100 before GST

AD01

**Lesson 1: C/S-Distributed-SOA Architecture**

**Lesson 2: Web Server & Application Server**

**Lesson 3: Middleware Services**

**Lesson 4: Database Services**
