

CompTIA

Foundation Technical Training

CompTIA serves the IT industry as the world's largest developer of **vendor-neutral IT certification** exams. Since establishing the certification program in 1993, more than one million CompTIA certifications have been earned worldwide. Currently, CompTIA offers certifications in PC hardware, networking, servers, project management, training, Linux, security and document imaging.

CompTIA's strength in providing certifications is a result of the support it receives from the industry. Businesses have come to trust and depend on CompTIA standards to provide a reliable predictor of employee success. Many companies with their own certification programs still use CompTIA certifications as prerequisites to validate foundation-level skill sets. Learn how CompTIA certifications can enhance your career or your business.
