- | Business Intelligence Development & Maintenance |

MCITP: SQL Server 2008

- | Database Administrator 2008 |
- | Database Developer 2008 |
- | Business Intelligence Developer 2008 |

SQL Server 2008 delivers on Microsoft's Data Platform vision by helping your organization manage any data, any place, and any time. SQL Server 2008 delivers a rich set of integrated services that enable you to do more with your data such as query, search, synchronize, report, and analyze. The MCTS credentials are designed for IT professionals who want to demonstrate their technical expertise in one of three areas: Implementation and Maintenance, Database Development, or Business Intelligence. Each of the MCITP programs build on an MCTS pre-requisite and is designed for IT professionals who want to demonstrate their expertise in using SQL Server 2008 for one of three specific job roles: Database Administrator, Database Developer, or Business Intelligence Developer.
