**MCTS: SharePoint 2010, Application Developer**

Windows SharePoint Services 3.0 takes full advantage of Microsoft ASP.NET 2.0 and the core Microsoft .NET 2.0 runtime. Office SharePoint Server 2007 is an integrated suite of server capabilities that can help improve organizational effectiveness by providing comprehensive content management and enterprise search, accelerating shared business processes, and facilitating information-sharing across boundaries for better business insight. There are two different tracks for each platform focusing on **configuration** and **application development** competencies. By using expert Microsoft Certified Trainers and Official Microsoft Learning Products, instructor-led training offers you a high quality, integrated, and engaging learning experience.
