

MCTS: .NET Framework 4

- Web Applications
- Windows Applications
- Service Communication
- Data Access
- Silverlight 4

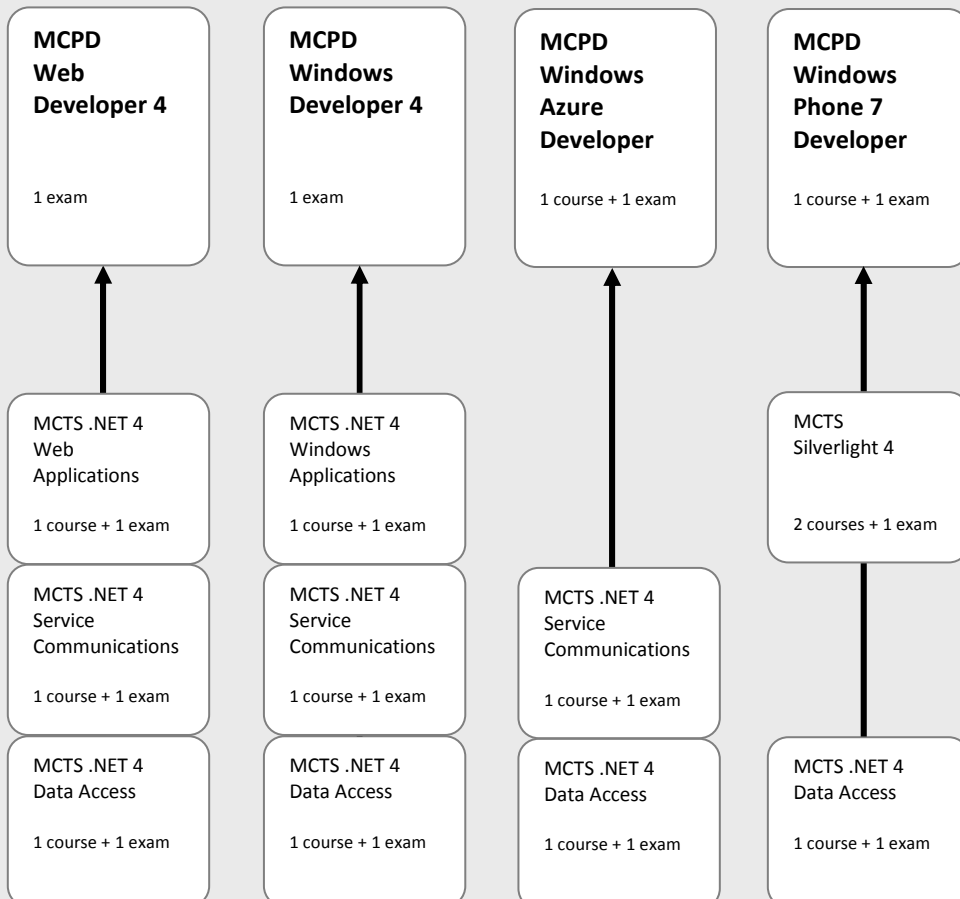

MCPD: .NET Framework 4

- Web Developer 4
- Windows Developer 4
- Windows Azure Developer
- Windows Phone Developer

Do you want to see if you are ready to develop for the Windows Azure platform? Do you have what it takes to create Web applications by using Microsoft ASP.NET, JavaScript, Ajax, and Microsoft Silverlight? What about desktop applications that use Windows Presentation Foundation (WPF) technology? Perhaps you are the services developer using WCF or maybe you are skilled at accessing data with ADO.NET. Getting certified on Visual Studio 2010 helps show employers and potential clients that you have the skills you need to be successful.

With Microsoft Visual Studio 2010, you can create what you can imagine, build on the strengths of your team, and open up new possibilities. New prototyping, modeling, and visual design tools enable you to create innovative applications for Windows and the Web. And you can take advantage of new opportunities and capabilities offered by multi-core programming and cloud development tools.
