

SUSE Linux Enterprise (SLE) 11

Novell Certified Linux Professional (Novell CLP) 11
Novell Certified Linux Administrator (Novell CLA) 11

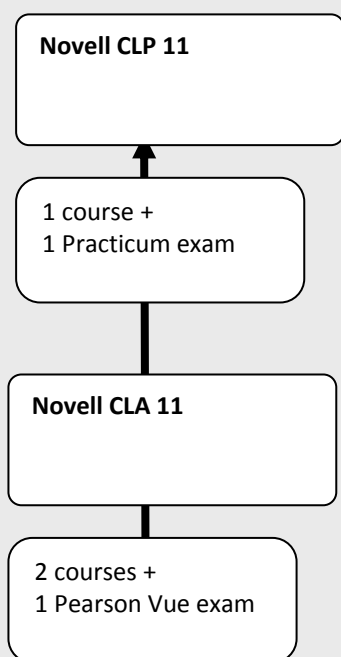

SUSE Linux Enterprise 11 is the most interoperable platform for mission-critical computing—both physical and virtual—from the desktop to the data center.

SUSE Linux Enterprise 11 gives you the lowest-cost, most manageable solution for mixed Linux and Windows computing. By working seamlessly with your existing technologies, SUSE Linux Enterprise turns boundaries into bridges to make your IT work as one.

SUSE Linux Enterprise 11 strengthens your infrastructure with powerful yet cost-effective enterprise capabilities that make it easy to migrate from UNIX. Choose SUSE Linux Enterprise 11 for mission-critical solutions that keep your infrastructure reliable and resilient.

What can you power with SUSE Linux Enterprise 11? Desktops and servers. Physical and virtual machines. Traditional systems and appliances. Linux ubiquity is here and it's ready to make your infrastructure more agile, manageable and cost-effective than ever.

TESTING FORMATS

Traditional (Form) Tests
 Traditional tests typically contain 60-70 test items and deliver the same set of questions to every test taker, regardless of the test taker's level of knowledge or proficiency. Your score on a traditional test depends on the number of questions you answer correctly. If you know a great deal about a topic, you can expect to answer more questions correctly than someone who knows less. Traditional tests have a long history and have proven very useful.

Practicum Tests
 In addition to Traditional testing, Novell Training Services delivers Practicum Testing. The Novell Practicum is designed to be extremely rigorous. It tests your working skills, not just your testing skills. The biggest problem in the industry is a shortage of skilled IT professionals. Bottom line is that employers are looking for individuals with experience, knowledge, and proven IT skills. Employees, and potential employees, need a way to prove that they are the best at what they do.

NOVELL'S CONTINUING CERTIFICATION REQUIREMENT (CCR)

From time to time, Novell Training Services may require you to take an exam to keep current on the latest solutions and technologies. These exams are considered a Continuing Certification Requirement (CCR), which keep your skills up-to-date and keep your certification valuable in the marketplace.
