

Java Enterprise Edition 6 (Java EE 6)

J2EE Framework

Oracle Certified Expert, Java Platform,
Enterprise Edition 6 Enterprise JavaBeans Developer

Oracle Certified Expert, Java Platform,
Enterprise Edition 6 JavaServer Pages and Servlet Developer

J2EE Framework (Non-Certification)

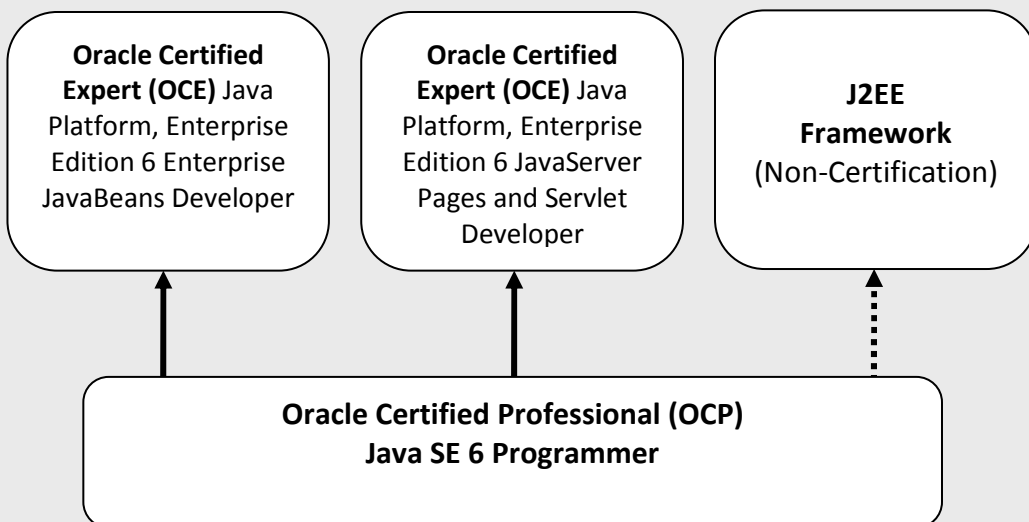

J2EE or Java Platform, Enterprise Edition (Java EE) builds on the solid foundation of Java Platform, Standard Edition (Java SE) and is the industry standard for implementing enterprise-class service-oriented architecture (SOA) and next-generation web applications. This assessment-based training package provides students with the basic and intermediate knowledge in J2EE Framework.

Oracle Certified Expert, Java Platform, Enterprise Edition 6 JavaServer Pages and Servlet Developer

This certification is geared toward experienced developers of Java technology applications. Certified individuals should have the knowledge and skills to quickly build web applications suited to any Java EE 6 application server using JSP and servlet technologies. They should be familiar with the current methods for analyzing, designing, developing, and deploying web applications with Java technologies and have some experience in constructing and deploying the small-to-medium scale web applications found in intranet and low-volume commercial sites.

Oracle Certified Expert, Java Platform, Enterprise Edition 6 Enterprise JavaBeans Developer

The Oracle Certified Expert, Java Platform, Enterprise Edition 6 Enterprise JavaBeans Developer should have the knowledge required to build robust back-end functionality using Enterprise JavaBeans (EJB[TM]) version 3.1 technology. Through careful exam preparation, the candidate should gain practical experience with the EJB technology coding experience of session beans and message driven-beans. This candidate should also be familiar with EJB design, best practices, transaction management, messaging fundamentals, and security.
